Editorial

Dear JPR Readers,

We are proud and happy to announce that the third issue of “The Journal of Pediatric Research” in 2024 has been published.

In this issue, we present to you 10 articles, including 8 Original Researches and 2 Case Reports. In an article, the authors evaluated the role of platelets in lung inflammation in patients with cystic fibrosis. Another study in this issue examined permanent tooth development and associated risk factors in patients treated for cancer before the age of six. There is also a single-center study reporting results evaluating the clinical features and outcomes of recurrent sacrococcygeal germ cell tumors.

This issue also includes articles titled “Hyponatremia as a Biochemical Marker of Complicated Acute Appendicitis: A Retrospective Cohort Study”, “An Evaluation of Previously Undiagnosed Childhood Primary Headache Cases Through Their EEG and MR Findings”, “Clinical Value of Systemic Immune Inflammation and Panimmune Inflammation in Adenoid Hypertrophy”, “Evaluation of Patients with Tall Stature Applying to Pediatric Endocrinology Clinic”, and “Investigating the Use of Therapeutic Hypothermia in Partially Eligible Infants: A Single-Center Experience”. Thus, readers will have the opportunity to read articles on different topics related to childhood. They will be able to access two featured case reports.

The Journal of Pediatric Research is indexed in Emerging Sources Citation Index (ESCI), Embase, Directory of Open Access Journals (DOAJ), EBSCO, CINAHL Complete Database, ProQuest, CABI, Gale/Cengage Learning, Ulakbim TR Dizin, TurkMedline, J-GATE, Ideal Online, Hinari, GOALI, ARDI, OARE, AGORA and Türkiye Citation Index. We thank the authors, referees, editorial team, and Galenos Publishing House for their support in the preparation of this issue. We look forward to your contributions to our future issues.

Best wishes
İpek KAPLAN BULUT
